# vervoe

Account Level Insights

Vervoe's new account level reporting and usage based insights help you make more informed decisions and surface the value of Vervoe in-app to support retention.
Metrics include number of roles assessed, top skills used, candidate volumes, candidate assessment start and completions, time savings (reduction in screening time), quality of hire (hired data) and EEOC data. This should help you not only get usage insight but also value insights like 'are our staff actively using it?' 'What roles are we using it for?' and 'What did we gain?' by surfacing that value in the app.

Comprehensive Usage Insights

Gain a detailed understanding of how Vervoe is being utilized across your organization with key metrics all in one place.

- **Number of Active Users**
- **Number of Custom Assessments**
- **Number of Roles Assessed**
- **Number of Candidates Processed**

| ACTIVE USERS	CUSTOM ASSESSMENT CREDITS	ROLES ASSESSED	CANDIDATES PROCESSED	TIME SAVED	CANDIDATE CSAT SCORE
10	15	10293	89,000	2040 hours	4.5
		1.3% Up from last month	4.3% Down from last month	1.8% Up from last month	1.8% Up from last month

Enhanced Decision-Making

Enhanced Decision-Making: Leverage data on time savings and quality of hire metrics to assess and improve your recruitment outcomes.

- **EEOC Distribution**

Demonstrate Value

More easily to stakeholders and identify areas for improvement to ensure continuous optimization.

- **Time Saved**
- **Hire Data**
- **Download CSVs per insight category or download PDF of account insights overall**

How It Works

Account level reporting and usage based insights are available to team members on every level in your account.

It can be found be found in the top level navigation, with Account Insights replacing the Hired tab (with Hired information being included within Account Insights).
